My Client Wants

Hey,

I hope you're doing well.
Just heard from the client.
They're willing to pay us $100 to build a site with the following requirements.

- A very small header, so that the site mostly shows off the content.
- A 2 column layout with some of their product features.
- Lots of strong horizontal lines
- Lots of ways to click "buy now"
- A footer with lots of buttons and images.

Is that cool?
Let me know ASAP.
Thanks!
